

Ethnicity

Work we are doing

- Checking the ethnicity of people with learning disabilities and their family carers
- Making sure managers are thinking about the needs of people who come from black and minority ethnic groups
- Making sure managers are thinking about people who come from black and minority ethnic groups when they design new services

Future Targets

To ask people with a learning disability and their family carers who come from black and minority ethnic groups what they think

- Is good about our services
- Is bad about our services
- What could make them better

We also want to ask people whether they know people with a learning disability in their communities.
