

What you need to know about leaving hospital

HM Government

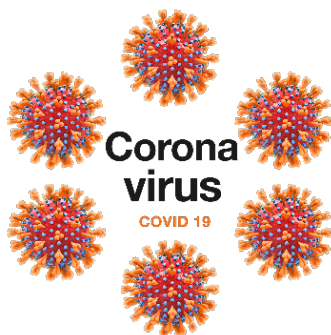

This Easy Read leaflet tells you

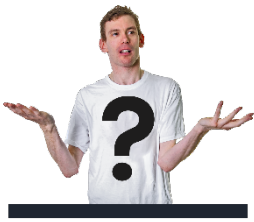

what will happen after you leave hospital.

It is important that all hospitals have enough **beds** to look after people with **coronavirus** who need hospital care.

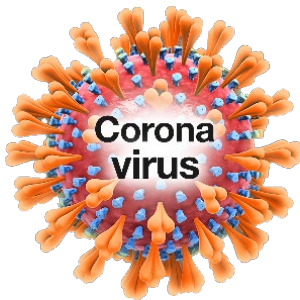

Coronavirus is also known as **COVID-19**.

What is COVID-19?

COVID-19 is a new illness that can make it hard for you to breathe.

It is caused by a virus called **coronavirus**.

There is no treatment for **coronavirus**.

Some people who get **coronavirus** will need to go to hospital.

To find out more about **coronavirus** and how to stop it spreading go to:

www.nhs.uk/coronavirus

What happens when I leave hospital?

Hospitals are under pressure to look after people with **coronavirus**.

You will need to leave hospital when:

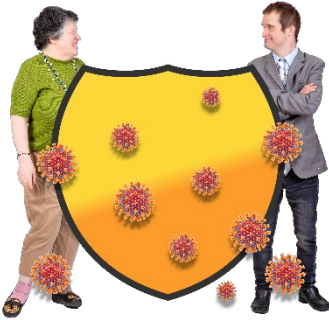

- you do not need hospital care

- you can get the right care **outside** hospital.

Your **health team** will decide when you leave.

When you leave hospital, it is very important that you:

- stay safe

- get the right care.

In most cases you will go **home**.

When you go home you may need care and support:

- to get dressed

- to wash

- to do shopping.

If you need more care and support, you may need to go to a **care home** or **nursing home**.

Before you leave hospital, someone will talk to you:

- about your care and support needs

- about the best way for you to leave hospital.
